2.3.4: Top 5 Communicable Diseases

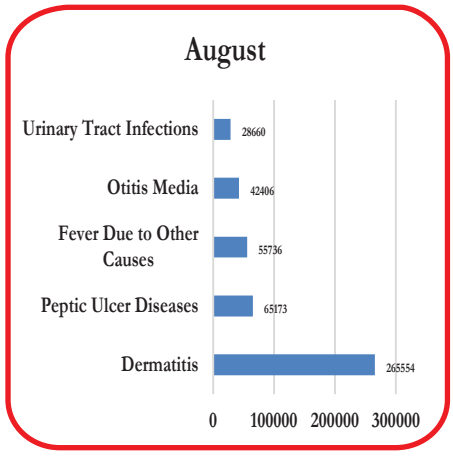

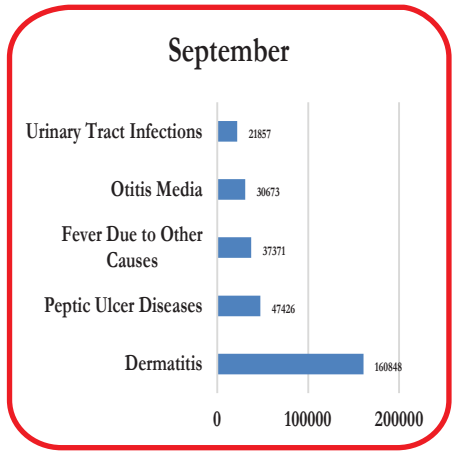

2.3.5: Top 4 Non-Communicable Cases

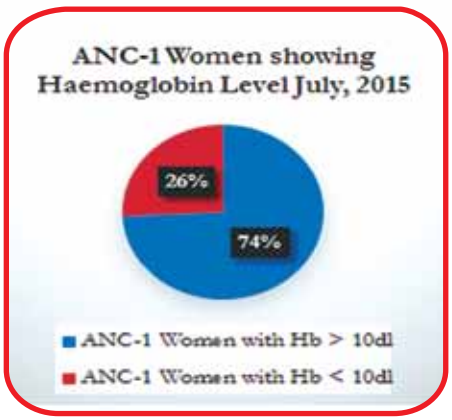

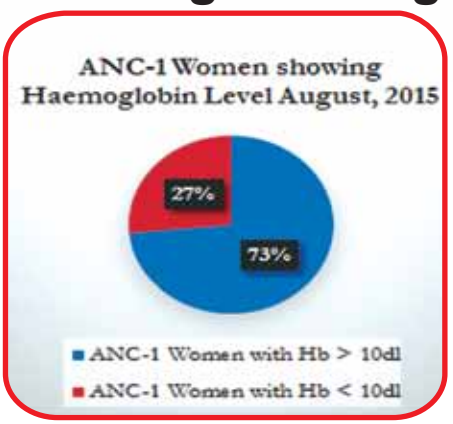

2.3.6 Tuberclosis

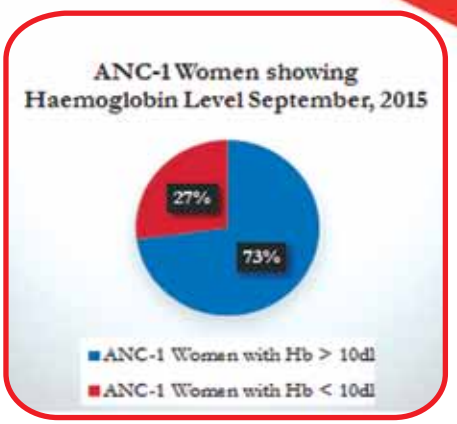

Months	Intensive-phase TB-DOTS Patients	Intensive-phase TB-DOTS Patients Missing Treatment > 1 Week
July	184	20
August	175	20
September	143	19

Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

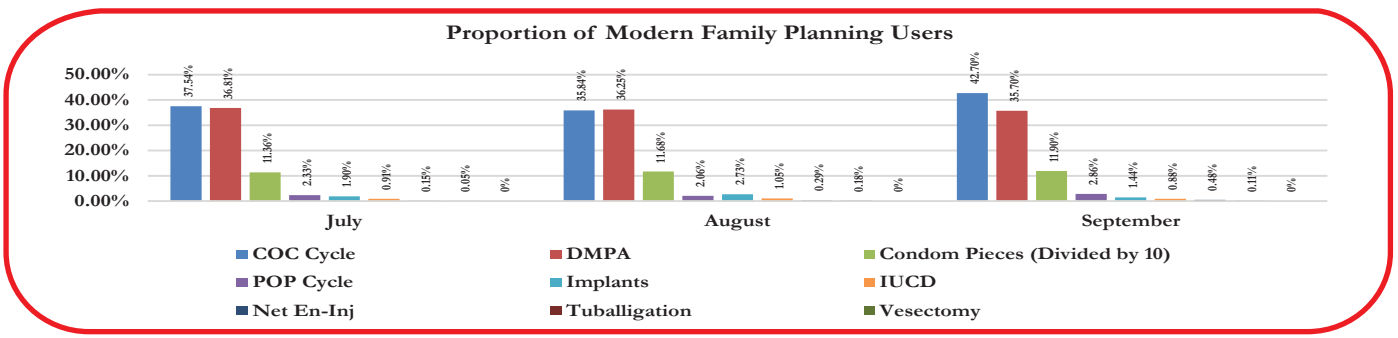

2.4 ANC-1 Women Showing Haemoglobin Level

2.4.1 Modern Family Planning Method Users:

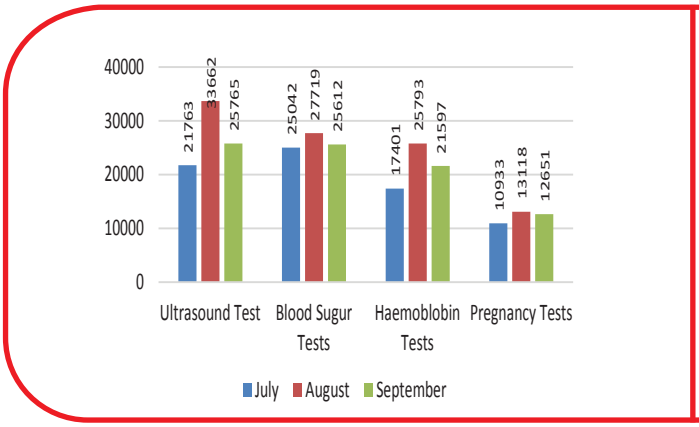

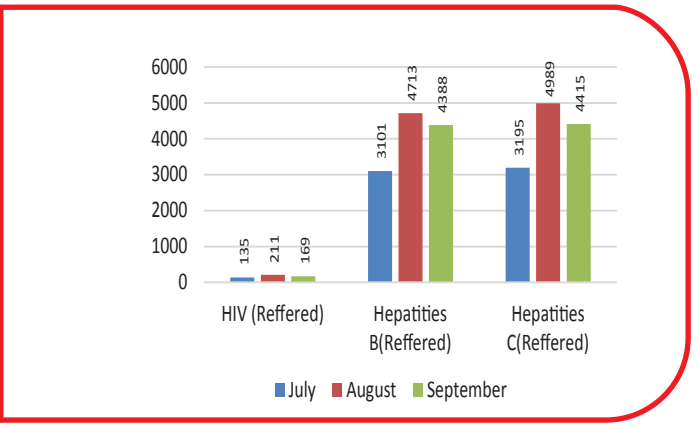

2.5 PPHI Diagnostic services:

During Jan-Sep 2015 alone, 228,927 ultrasound tests were undertaken – all free of cost. The success of the service can be judged from the fact that 128,493 pregnancies were confirmed; 1,311 Intra-uterine deaths were diagnosed; 2,829 cases of Missed Abortion were detected and more importantly – 1109 cases of ectopic pregnancies were diagnosed thus lives were saved.

2.5.1 Routine Lab Tests

Hapatitis B & Hepatitis C Detection & referral

Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

2.6 Midwife Training

125 Midwifery trainings candidates started their training course at PNFWP , Zia-ul-din University Karachi & Isra University Hyderabad, by PPHI Sindh bearing all expenses of the training institute along with 10000 stipend per for each candidate

2.7 PPHI IT Department

IT Department aims at to convert from manual processing to paperless environment. Recently ERP System has been implemented computerized paperless procurement system in Head Office, this modules offers the ability to: Track requisition requests Create and manage purchase orders Create and manage transfer orders Receive assets and many other useful features.Beside this Fixed Assets module it is also in progress of development, which provides complete visibility into PPHI assets and depreciation calculations. Using this module PPHI add fixed assets from Procurement purchases, or add them individually. Depreciation schedules are automatically created and detailed reports are available.

2.8 SUCCESS STORY OF PPHI SINDH, District HYDERABAD

Mr. Niaz Hussain Channa is the senior most and hard working member of PPHI SINDH family. Blessed with the qualities of being humble , truthful, open-minded, clear headed and sincere, he is very simple person, a down to earth fellow. Being a firm believer in team work, participatory approach and master trainer of DHIS, he has always come up with new ideas, out of box solutions and innovation in routine works. The achievements and skills he has at his credit are:

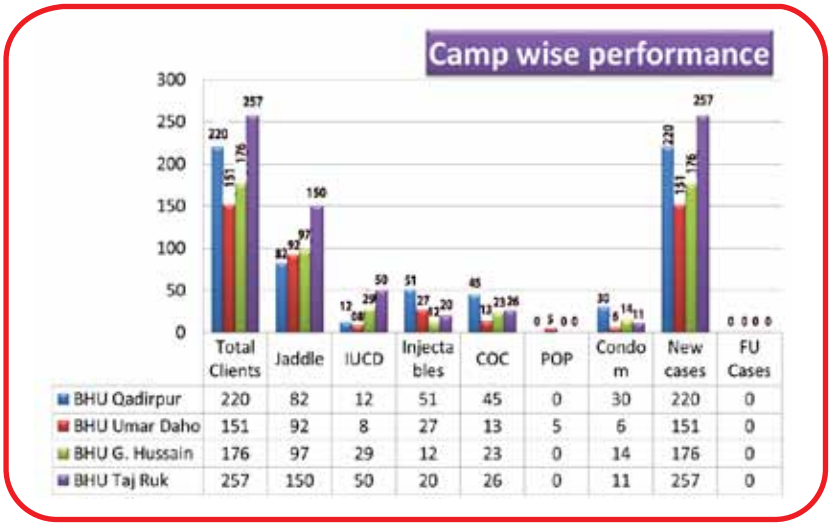

i) Trainings on DHIS to Medic and Para-medic staff
ii) Implementation of DHIS with soul and spirit
iii) Housekeeping of Health Facilities
iv) Effective and result oriented visits of Health Facilities
v) Supportive and encourageous to his staff
vi) Conflict resolution skills
vii) Planner and target oriented
viii) Voracious and vocal to defend any challenge
ix) Team leading and team management skills.

Bestowed with the qualities of punctuality, boldness and target achiever, he has been found thristy for learning more and doing more. He is fusion of some unparallel qualities like being efficient monitoring officer he has excellent computer and drafting skills. He has left good and unforgettable memories and examples where ever he has worked. He has also the ability of achieving the targets in the shortest time period. Moreover, his motivational skills are unequivocal that makes the employees to work and serve more dedicatedly. The PPHI Hyderabad team recognizes his work as an elegant team leader and he is indeed an asset of PPHI SINDH family.

Quarterly Bulletin
Quarterly Performance Review July to September, 2015

PPHI

Introduction

"Since Feb 2007, PPHI was the name given to a Public – Private Partnership between the Sindh Rural Support Organization (SRSO) and the Government of Sindh (GOS). PPHI – Sindh is now the name of a private "Company" registered under section 42 of the Companies Ordinance, 1984. In January 2014, this new Company received the assignment that was earlier with the SRSO. The first Partnership and the present are both for the management of Primary Healthcare (PHC) infrastructure of the GOS.

In Feb 2007, when the GOS took the innovative route, it had only one object in mind. Its PHC infrastructure in the rural areas – valued conservatively around Rs. 20 Billion –was either sub–optimally operational or altogether dysfunctional. The Health Profile of the population was so disturbing that this infrastructure had to be made urgently and optimally operational. The route taken was to "contract –out" management of Government's infrastructure to the Private sector. It was named PPHI. It started with just one District – Kashmore – and now extends to 22. PPHI – Sindh presently managing 9 RHCs, 649 BHUs, 35 MCHCs and 435 Dispensaries and 12 others a total of 1140 Health Facilities in rural Sindh. This is the size of the opportunity and the challenge for the PPHI – Sindh.

PPHI has come to mean arranging many more Healthcare Providers specially in remote and hard–to–access rural areas. It has come to mean Healthcare for Mother & Child; sufficient availability of essential medical supplies; Health Education; Immunization; Communities connected with Health Facilities (HFs). It has come to mean so much more as the following pages shall show.

Your comments shall help us in serving the Poor in rural Sindh better. We request you to advise us and to guide us. We eagerly wait to hear from you."

Mission

- "To bring the Primary Health Care (PHC) infrastructure, that was by and large dysfunctional, to an optimum level of
- performance in terms of all the eight constituents of the PHC.
- To achieve the above without the use of any significant additional resources.
- To demonstrate a better and more efficient use of the available human and financial resources.
- To assist in the evolution of a sustainable PHC program that the state and the citizen have reasons to be satisfied with."

#	Type of PHC-HFs	Total HFs	HFs with Health	HFs with PPHI	%age
1	RHC	113	104	9	8%
2	BHUs	782	132	649	83%
3	MCHCs / Maternity Homes	90	56	35	38%
4	Dispensaries	835	400	435	52%
5	Others	132	120	12	9%
	Total	1952	812	1140	58%

PPHI

PPHI Bulletin - A Contribution to Health Information System:

Dr. Riaz Ahmed Memon
CEO

Dr. Abdul Sattar Chandio
Director (Health Services)

There have been many efforts in the past to arrange a reliable and accountable Health Information System. PPHI, under the leadership of its CEO, Dr. Raiz Memon and Director Health Services, Dr Abdul Sattar Chandio, hasre–orgaized DHIS for PPHI Health Facilities own reporting after considerable preparatory work. PPHI's data can now be shared among stakeholders with a High degree of confidence.

All PPHI data is collected through the incharge MOs at HFs on HMIS / DHIS proformas. This data is carefully checked by Senior Manager IT,Mr Uzair Aslam Bhatti,who has efficiently placed the DHIS software, developed by the Ministry of Health / JICA,on PPHI's website. After collection of the monthly reports, the District level staff enter the data into DHIS software directly. The data is carefully compiled and disse-minated while giving due consideration on data accuracy. We at PPHI continue our efforts to improve the quality of the data that we present. We shall be highly grateful for any advice and suggestions from our readers as this will help us to improve our services in future.

Section I: Inputs by PPHI Sindh

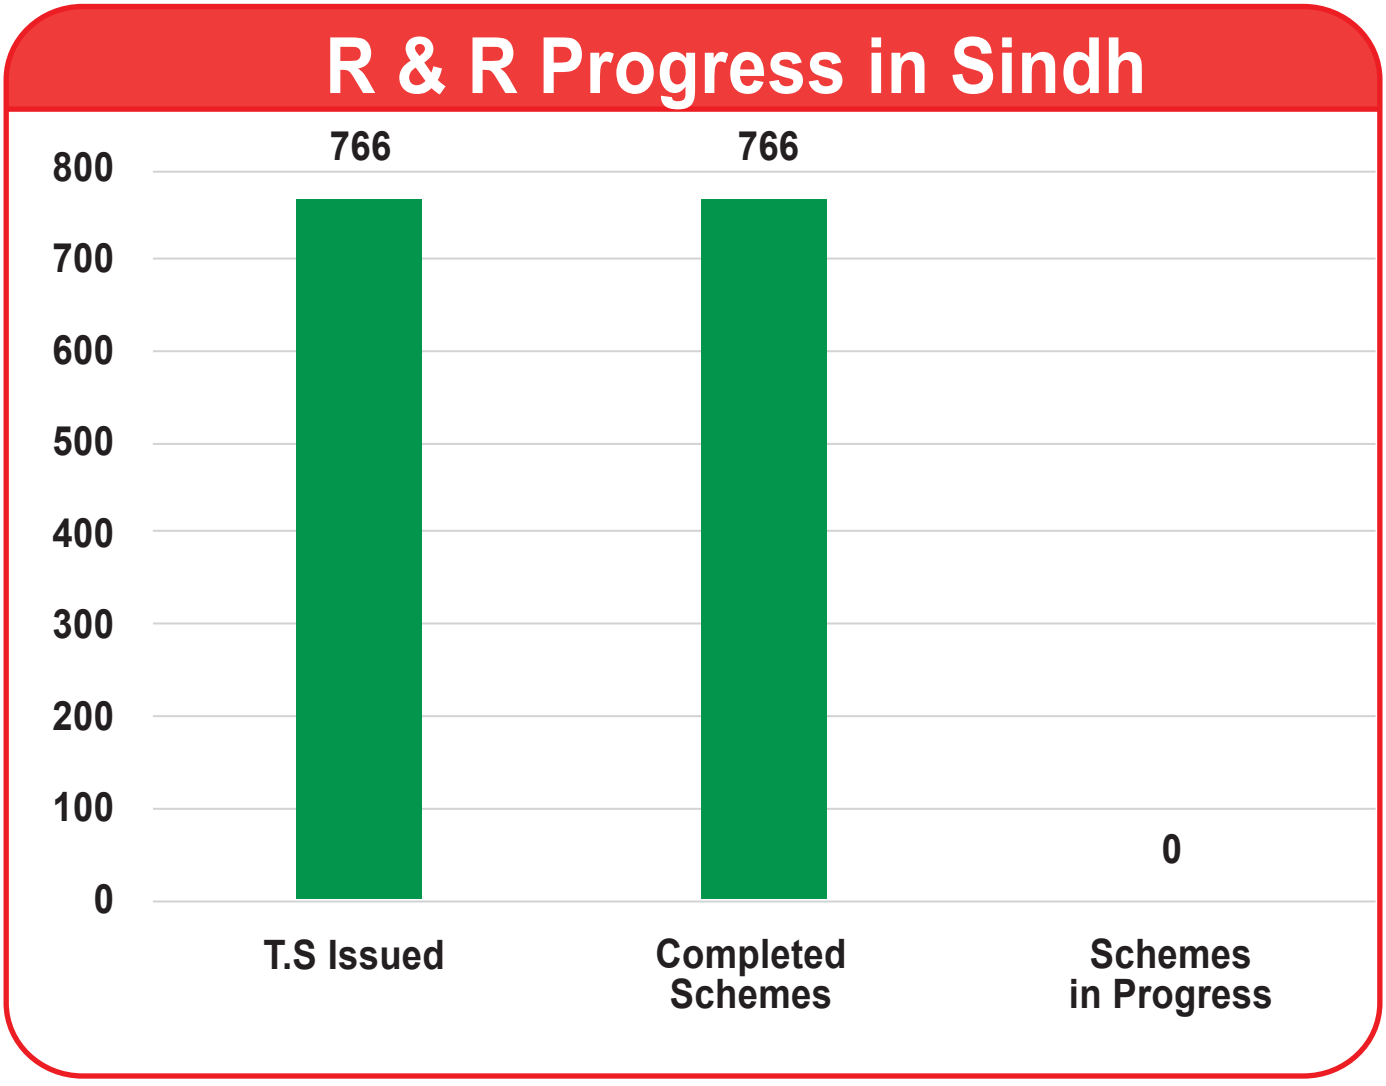

1.1: Availability of Human Resource at Health Facilities:

Sr.#	Healthcare Providers	GOVT Staff	PPHI Staff	Total Staff	%age PPHI Staff
1	Medical Officers (Male)	363	722	1085	67%
2	Female Medical Officers	21	398	419	95%
3	Dispensers /HTs	864	630	1494	42%
4	LHVs/MWs	470	579	1049	55%

PPHI has filled HR gap through appointment of Medical and Paramedical staff at HFs. People can expect to get benefit from the huge investment of the state in various Preventive, Promotive and Curative programs. In addition, PPHI has deployed Lady Doctors – first time ever in the history of the country – to the HFs in villages. This has fundamentally changed the health environment for the rural women. It has created a huge opportunity for PPHI to increase its services in the areas such as vaccination, antenatal care, deliveries and utilization of contraceptive materials at the health facilities.

Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

1.2: Physical Infrastructure :
District-Wise Repair and Renovation(R&R) Status:

Most of the 1,140 HFs with the PPHI were in dilapidated state. GOS, on proposal from PPHI, approved a special grant of Rs 500,000/BHU and Rs 300,000/GDs for repair and renovation. By end of the year 2013, PPHI has completed repair & renovation at 766 HFs. The work of repair and renovation were completed at 35% less cost than the Government "Scheduled" Rates." Routine maintenance of HFs has not been overlooked either.

Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

1.3 Making Mother and Child Health Centres (BHU Plus) Operational:

No round–the–clock MCH Center is available in the rural areas. PPHI has made an important beginning with 37 MCHCs operating 24/7 and 6 MCHCs operating 12/6. These MCHCs are equipped with Diagnostic Labs and Ambulanceservices. Up till now 105 MCHC Center are operating 24/7 total in Sindh

1.4 Mobile/Stationery Ultrasound Tests Facility:

For the first time in the history of Sindh, PPHI is providing the facilities with Ultrasound facility for giving an additional benefit to the people in the villages. Total 81 high quality Ultrasound Machines, with portable generators have been provided to ensure uninterrupted power supply. Already 35 Sonologists are hired and assigned cluster of 8 to 10 HFs for conducting Free–of–Cost Sonograms for women and sharing findings with I/c Lady Doctor of the PPHI. Schedule of Sonologists is circulated in advance and widely publicized. LHWs of the area are further encouraged to refer pregnant ladies for Ultrasound . Please see the Ultrasound table below for PPHI coverage.

No. of HF with fortnightly Ultra Sound Coverage	No. of HF with Weekly Ultra Sound Coverage	No. of HF with Daily Ultra Sound Coverage
250	98	41

Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

PPHI

1.5 The New Pharmacies

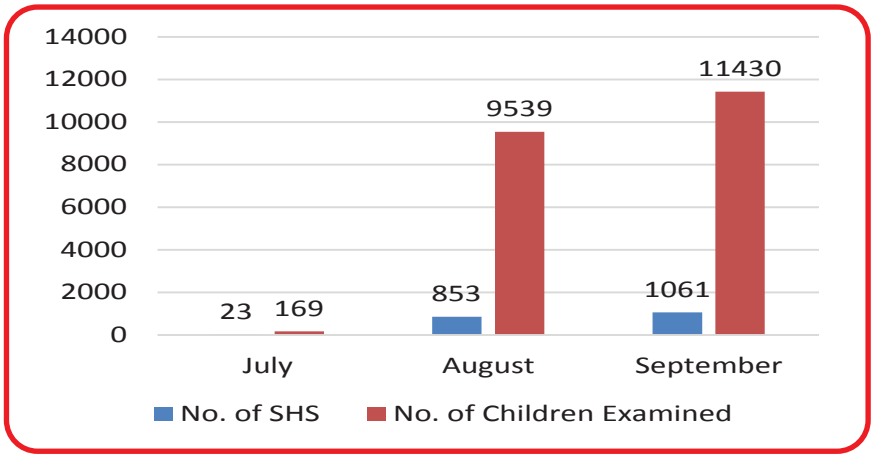

PPHI is providing 90 medicines & 20 related items to the Patients at every HF free of charge. These medicines are procured from National & Multi-national Pharmaceuticals of good repute. No medicine is supplied to a HF without Quality Tests at Government Laboratories. Only, packed or stripped medicines are supplied at HFs. In this way, the Pharmacies at rural HFs have improved in terms of quantity, quality and coverage. Disposable syringes are provided at every HF. It is ensured that regular supply of medicines and material are delivered at the HF through centralized arrangements at the District level.

1.6 Health Education

"Health Sessions" are a regular feature at schools in the catchment area with the object of providing education on key health issues, healthy life and prevention from disease. Doctors are also expected to provide medical assistance to school children during School Health Sessions. Furthermore, Health Education is also being provided to the commnity on a regular basis every month through community health sessions.

Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

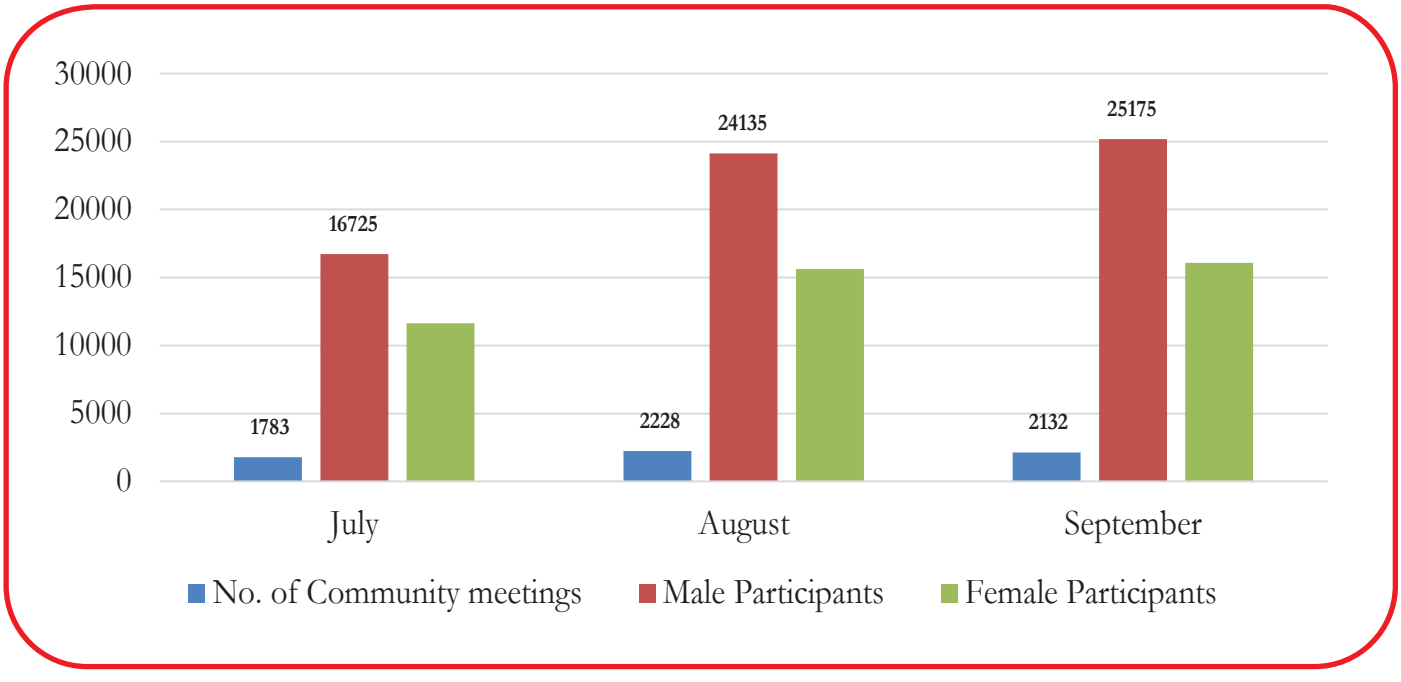

1.7 Capacity Building of Healthcare Providers:

Training of Health care providers on managing the health facilities in an efficient manner as well as to tackle any new challenges has always been a priority and been conducted on regular basis. PPHI always welcomes participation in Government/NGO run training programs as well as conducts specialized sessions of its own.Under contractual arrangement, Civil Hospital Karachi is providing 06-weeks Ultrasound training to PPHI Lady Doctors from far flung areas. Beside Specialists, Focal Persons for Vertical Programs and other stakeholders are regularly invited to conduct training sessions at "Monthly Review Meetings" in the Districts.

S#	Staff	Topics	July	August	September
1	Capacity Building Session for Doctors	DHIS, Family Planning, Clinical Malaria, Hand Washing and Immunization	5	49	24
2	Capacity Building Session for Paramedics	DHIS, AURT, Family Planning and Immunization, Clinical Malaria, Hand Washing and Eye Problem	606	178	53

1.8 Community Participation:

To connect community with HFs,Community Support Groups (CSG) have been formed (225 are female Support Groups, 410 are Male Support Groups).Comprehensive TORs have been developed detailing on the process of formation of these Groups, They meet on monthly basis to improve quality of services in community health register of DHIS and increase utilization of services. Minutes of Monthly CSG meetings are recorded and updated at every HF.

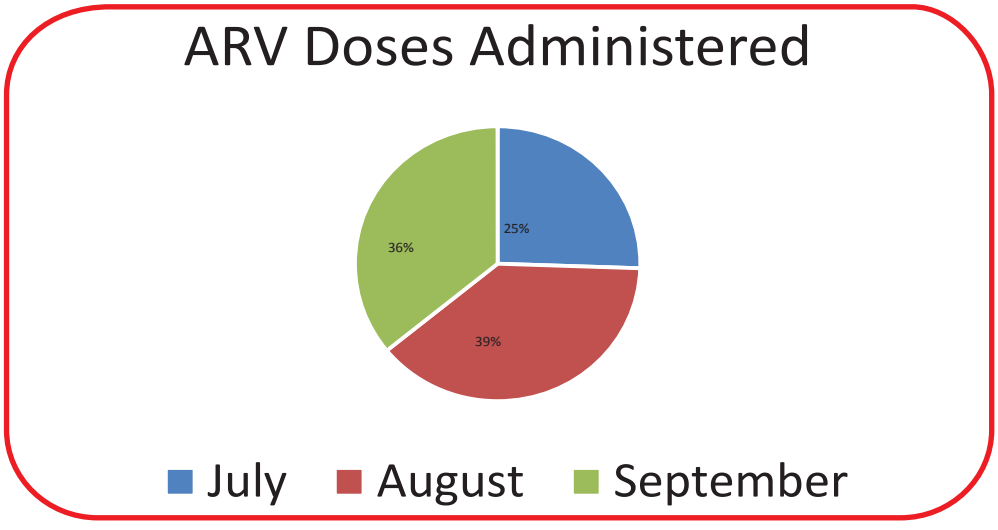

Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

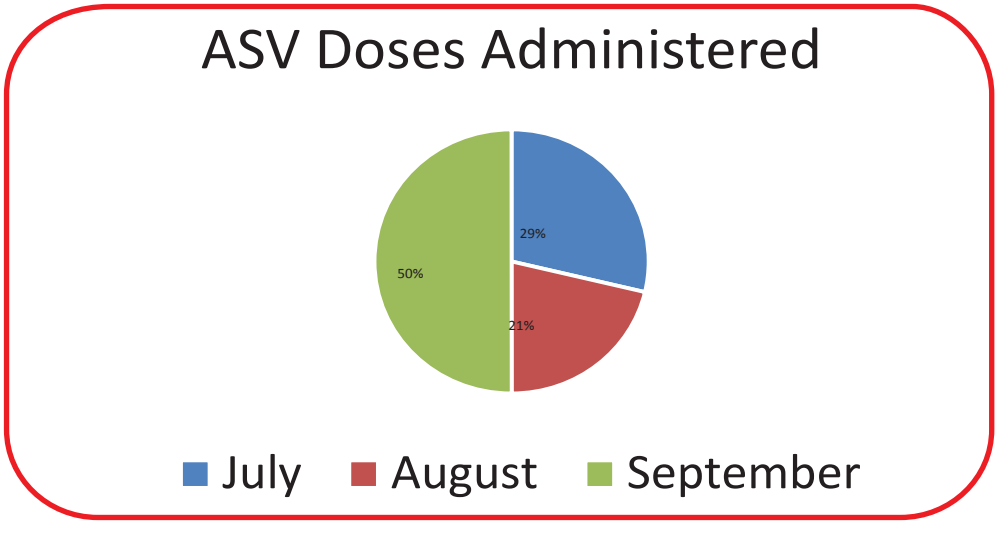

1.9 Addition of PPHI Vaccination Centers

Routine vaccination is one of the best possible solution to achieve Health Output/ Indicators. In the past, at the 1,139 HFs, there were only 425 EPI Refrigerators were available. PPHI has added 155 new Cold Chain Points and appointed the same numbers of Vaccinators. It must be noted that EPI as a "Program" is neither with PPHI management nor PPHI receives funding earmarked for EPI.

1.10 Anti Rabies & Antisnake Venoum Vaccine used

PPHI has provided 93,2118 Anti Rabies Vaccinations (ARV) at its focal HFs with IM regime. All Districts have budget for ARV/ASV vaccines. It is only PPHI that is providing these vaccines.

Source: The data has been collected on HMIS/DHIS format from all incharge MOs of HFs. There has been no comment on its validity from any StakeHolders.

PPHI

1.11 PPHI Ambulance Service:

PPHI has made a land mark addition in the range of services by introducing Ambulance service for timely. In the first phase, 66 Ambulances,including: including:

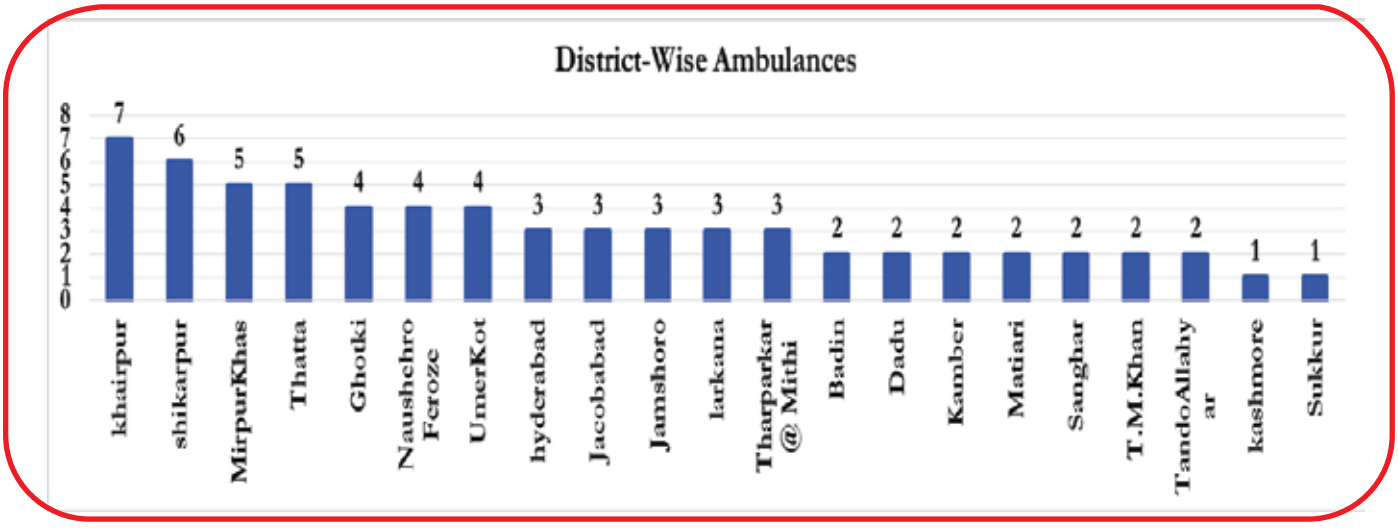

- 6 Advanced Cardiac Life Support (ACLS) Ambulances,
- 25 basic life Support Ambulances,
- The aforementioned 36 Ambulances have trained Doctors and staff accompanying patients in distress. Besides, every 24/7 MCH Center has been provided dedicated Ambulance for strengtheing referral system.

1.12 Value addition services

→BHUs Provided with Lab Facility :	71
→BHUs Provided with Ambulances:	61
→BHUs Provided with Electricity:	493
→BHUs Provided with Solar Power:	37
→BHUs Provided with furniture/Equipment:	1050
→BHUs Provided with Water Supply :	654
→BHUs Provided with Labor Rooms :	630
→BHUs/MCHC Provided with generators:	35
